ABORIGINAL HEALTH SERVICES
The economic benefits of eliminating Indigenous health inequality in the Northern Territory
Yuejen Zhao, Siva R Vemuri and Dinesh Arya

Australian Burden of Disease Study: impact and causes of illness and death in Aboriginal and Torres Strait Islander people 2011
AIHW September 2016
This report provides estimates of the non-fatal and fatal burden of disease for the Aboriginal and Torres Strait Islander population as well as estimates of the gap in disease burden between Indigenous and non-Indigenous Australians. The disease groups causing the most burden among Indigenous Australians in 2011 were mental and substance use disorders, injuries, cardiovascular diseases, cancer and respiratory diseases.
The Study of Environment on Aboriginal Resilience and Child Health (SEARCH): a long-term platform for closing the gap.
Wright D, Gordon R, Carr D, et al

**AUGED CARE**

**Home-Based Care Program Reduces Disability And Promotes Aging In Place**
Sarah L. Szanton, Bruce Leff, Jennifer L. Wolff, Laken Roberts, and Laura N. Gitlin
*Health Affairs* 2016 35:1558-1563

Older peoples' experiences of living in a residential aged care facility in Australia.
Walker, Helen; Paliaedelis, Penelope.

**Australian aged-care nursing competencies in the works**
*Aged Care Insite* 21 September, 2016
Researchers are planning to develop a homegrown framework for registered nurses working with older people and their families. Associate professor Victoria Traynor, from the University of Wollongong's School of Nursing, said the available nursing competencies for the aged-care sector were developed in North America, where the model of healthcare and nursing is very different to Australia's. “As the ageing.....

**Aged-care cuts will increase strain on public hospitals: provider**
*Aged Care Insite*, 2 September 2016
Funding cuts in the sector may force residential aged-care service providers to reconsider admitting older people ready to be discharged from hospitals, increasing pressure on the public system, a provider has said. In a letter to state and territory premiers and health ministers, UnitingCare Australia warned about the impact cuts will have on public hospitals and asked for their help in ...

**Families Caring for an Aging America**
Richard Schulz and Jill Eden, 2016

Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion’s share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population.

**eHEALTH**

**eHealth systems to underpin $361 million Qld specialist outpatients strategy**
*Pulse IT*, 7 September 2016
GP referrals will be submitted by secure electronic messaging to Queensland’s largest public hospitals and patients will have access to an online specialist appointments management system under an ambitious, four-year, $361 million plan by the Queensland government to provide more outpatients appointments and reduce waiting times.

High-need, high-cost patients: Who are they and how do they use health care?
The Commonwealth Fund, August 2016
Key findings: High-need adults differed notably from adults with multiple chronic diseases but no functional limitations. They had annual health care expenditures that were nearly three times higher—and which were more likely to remain high over two years of observation—and out-of-pocket expenses that were more than a third higher, despite their lower incomes. On average, rates of hospital use for high-need adults were more than twice those for adults with multiple chronic conditions only; high-need adults also visited the doctor more frequently and used more home health care.

Evidence Brief 14 Consumer Co-Creation in Health Innovating in Primary Health Networks
Rebecca Randall
Consumers Health Forum of Australia, 22 September 2016
While healthcare consumers continue to be involved as active participants in managing their own health, the focus is now moving to include consumers in value creation in health care planning and delivery. As the health system moves toward a devolved model of care, the need to focus on consumer’s needs is increasingly important at both a policy and practice level. The growing body of literature on health value co-creation and its benefits in the health sector shows that value can be co-created for the individual consumer, clinical practices, health care organisations, and governments.

New Health Systems in Transition (HiT) report for Romania: incremental reforms and incremental improvements
Cristian Vlădescu, et al
Health Systems in Transition 2016 Vol.18 No.4
There has been a constant cycle of reform in the Romanian health system and yet, due in part to instability, it has failed to resolve underlying problems. Recent and ongoing health care reforms are seen by both patients and health care professionals as being fragmented and poorly coordinated, and lacking in continuity. The perception persists that they have been aimed at achieving financial balance at the expense of long-term goals. In addition, as this new HiT on Romania shows, ensuring stability in governance remains a systemic challenge as does addressing corruption in health care (and other) sectors.

Social care for older people: home truths
The King’s Fund, September 2016
Our new report, published with the Nuffield Trust, looks at the impact of changes in local authority spending on social care for older people. The picture that emerges is of social care under huge pressure, leaving older people, their families and carers to pick up the pieces.

Women’s health and well-being in Europe: beyond the mortality advantage
World Health Organization, September 2016
Women are in focus as the 66th session of the Region Committee considers a strategy for
women’s health and well-being in Europe. This report supports the strategy with key facts about women’s health and well-being in different parts of the region, it shows the impact of gender based inequalities interacting with social, economic and environmental determinants and it looks at how people-centered health systems can respond to women’s needs across the life-course.

Keeping the lights on: lessons from South Australia’s power shock

Tony Wood and David Blowers

Grattan Institute, September 2016.

Soaring South Australian wholesale electricity prices in July have exposed the urgent need for Australia to develop climate change and energy policies that combine to maintain reliable, affordable and sustainable power. The documents how the state’s wholesale electricity price averaged $230 per megawatt hour over the month – three and a half times the price in eastern states.
